

Hard Probes 2004

International Conference on Hard Probes of High Energy Nuclear Collisions

Lisbon, Portugal
November 4-10, 2004

This conference will address the role of hard probes in understanding the QCD matter produced in high energy nuclear collisions. Topics include

- quarkonia, open charm and beauty,
- hard jets, photons and dileptons,
- and the initial state parton structure.

The conference will be held in Ericeira, a charming fishing town and resort near Lisbon. It will begin with a one-day school for graduate students and post-docs.
